

PARK IGLS

Park Igls is a medical detox clinic that adheres to the Mayr principle, which is based around one simple belief: clean guts are the route to good health. A stay in this bright, contemporary space in the scenic Tyrolean Alps offers to reboot your entire system with a light diet, gentle exercise plan and tailor-made course of treatments. Food and nutrition are a key part of any stay and locally sourced organic ingredients make for beautifully crafted dishes that are surprisingly delicious as well as healthy. Alongside the food, guests can expect cutting-edge conventional and complimentary medicine, coaching and preventive care, all of which follows a comprehensive check-up. The medical attention is matched with more low-key health-boosting activities, including guided walks, yoga and personal training. Ready to book? Look no further than Healing Holidays.
